Format:	In-person
Expected attendees:	250

On behalf of the Local Organising Committee and the International Program Committee, we are pleased to invite you to the 25th International Stellarator Heliotron Workshop (ISHW-2026), which will take place in the historic city of Córdoba, Spain, from April 20 to 24, 2026.

The event, organised by the Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas (CIEMAT) and the University of Córdoba, will be held at the Córdoba Conference and Exhibition Center (Palacio de Congresos), a beautiful 16th-century building located in the heart of Córdoba's old town, just steps away from the renowned Mosque-Cathedral of Córdoba, a UNESCO World Heritage Site since 1984.

The scientific programme will include invited lectures, oral and poster presentations, and is open to contributions on all aspects of plasma physics, science, and technology in helical devices.

The main topics covered are:

- 3D effects on transport and confinement
- Impurity sources and transport
- Plasma edge physics and plasma wall interaction
- Energetic particles, MHD and plasma stability
- Theory and simulation
- Energy, particle and momentum transport
- Stellarator relevant fusion technology
- Stellarator and Heliotron reactor design studies
- 3D effects in Tokamaks and Reversed Field Pinches

Exhibitors and sponsors are also cordially invited to participate in the 25th International Stellarator Heliotron Workshop. This event offers companies a valuable opportunity to showcase their innovations, capabilities, and expertise to the international stellarator fusion community.

- **Featured presence:** Brand visibility in official event materials such as the program, signage, and website, in a high-level international scientific environment.
- **Access to relevant scientific content:** Participation as observers in key scientific sessions, with direct exposure to the latest advances in fusion physics and technology.
- **Interaction with leading researchers:** Gain direct access to leading researchers and key institutions from around the world in the development of stellarator and heliotron devices.
- **Contribution to scientific progress:** Support for a platform that fosters innovation in fusion energy through the exchange of results, ideas, and projects.
